Ready to take off?

Are you and your child ready to be
part of something magical?

Introduction

Hello and welcome to JCPRO Academy!

We are new and so is our vision.

We are different from other schools because our curriculum is an exceptional blend of life skills, sports, and academics. We stand out so that your child does too.

Are you and your child ready to be part of something magical? Read on to know how.

Who are we?

We are a coeducational day school from kindergarten to Grade 5. We are a joint effort of JUST Cricket Academy and Prose Education.

JUST Cricket is an institution that opens up various career opportunities for their students by giving equal importance to academics along with cricket training. It is equipped with the latest infrastructure and experienced coaches who craft training plans that include diet and nutrition.

Prose Education offers a nationally certified online schooling program with the vision of achieving equal participation in sports and academics.

And we're here to give your child a dynamic, holistic learning experience.

To enable your child to live an enriching life, both professional and personal.

”Together,
we are
JCPRO
Academy.”

Our mission

Helping mould a rewarding future for your child is our mission.

We are here to help your child be their best selves, and celebrate them for what they are, whether it's in our classrooms, on a stage, or in the field.

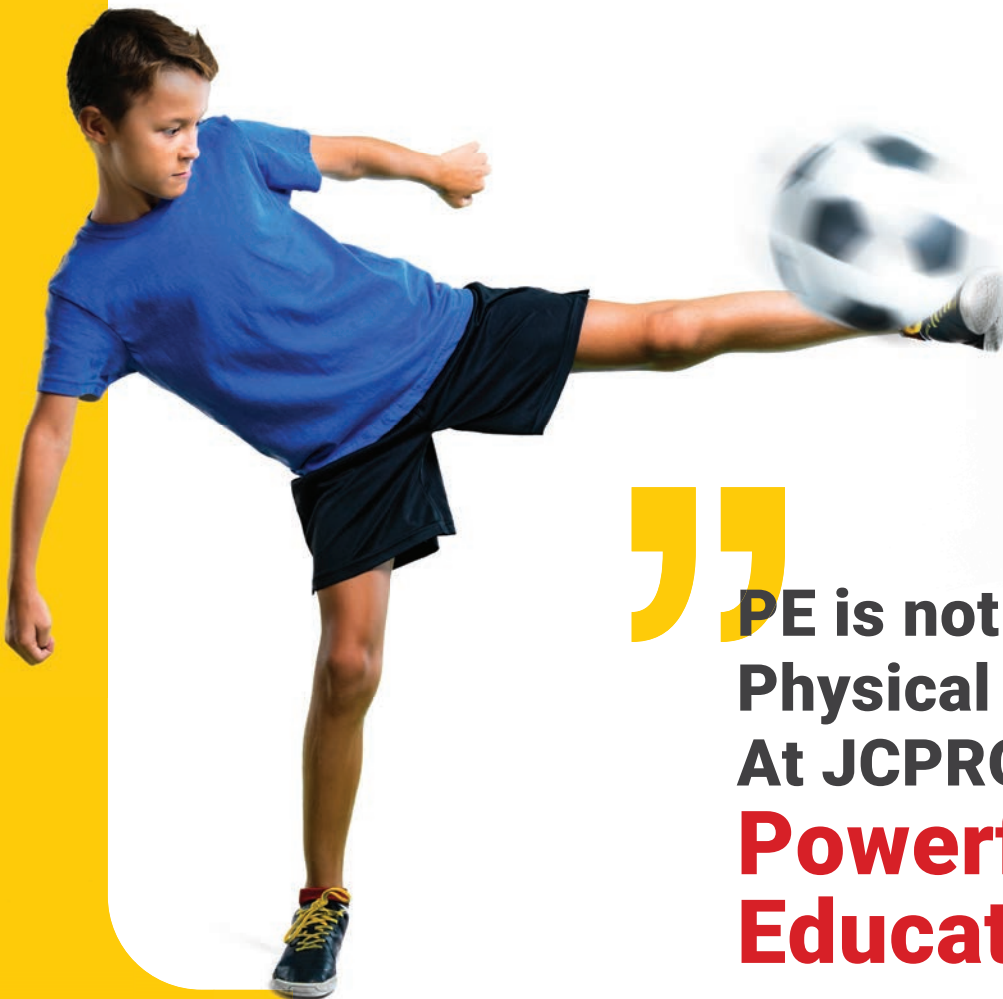

We are here to show them that they can play a different game and be good at it.

Our vision

Our vision is to prepare your child to be citizens of the world.

How?

By providing your child with the building blocks that shape them to be one. Ours is a school of the future with a learning environment where students master academics, sports, arts and other skills on par.

”

**PE is not just
Physical Education.
At JCPRO, it is
Powerful
Education.**

”

Why choose JCPRO Academy?

**Multi-age
classrooms**

**Integrating
creative arts**

**Long-Term
Athletic Development
(LTAD) model**

Challenges in conventional education

Schooling today is focused on learning by rote. On numbers. On the strength of memory instead of creativity, and following instead of leading.

“Study, don’t play!”

In India, sports has always come second to academics, being considered either a pastime or a passion. The decision to pursue a career in sports is based on pure interest and not on a well-reasoned, scientifically backed plan.

“Take off those headphones, and finish your homework!”

Similar to sports, performing arts like music, dance, and theatre have traditionally been relegated to being a hobby rather than a serious career.

“Did you score more this time?”

Schools have conventionally placed great emphasis on ranks, marks, and other grading systems to assess a child’s learning. It’s a system that does not take into account a child’s holistic development or consider different career paths.

**”Because playing
for the Indian cricket team
need not be the only
dream to chase.”**

JCPRO is different

At JCPRO Academy, we focus on learning by unlearning. When you think of sports, we want you to think not just 'player' but also 'journalist', 'coach', 'business-owner', and so on.

Here, we provide your child with a field of opportunities by placing sports at the intersection of subjects like maths, science, and arts. We emphasise on the relevance of these subjects in relation to sports to enable children to choose their dream path. Whether they want to be a sports physio or a sports PR specialist or make it big in the athlete management business, we ensure they're ready.

We do that by blending three educational models that have been developed internationally to ensure optimal success.

”

**Every child
is unique.
Every child
is an individual
waiting to
come into
their own.**

”

Multi-age classrooms

At JCPRO Academy, we recognise that and we believe that segregating students based on their birth date is not conducive to true learning. Instead, our multi-age classrooms might have a precocious 3rd grader along with a brilliant 5th grader.

Our classes bring students of different ages and abilities together under the direction of a single teacher to enable students to bloom and learn according to their individual capabilities.

How this works

- Your child studies with the same teacher for two to three years forming stronger relationships in school
- Your child learns with students of different ages and skills allowing them to learn collaboration and form friendships
- Your child progresses at a pace that's right for them, which makes schooling an experience and a joy rather than a chore.

LTAD model

Long-term Athletic Development or LTAD is a model that allows children to engage in long-term, health-enhancing physical activities according to the stages of their development.

It is designed to nurture the budding Virats and Sainas of the world!

How this works

- Sharpens motor skills from an early age
- Ensures systematic training in athletic skills in line with the child's physical development
- It prepares your child to not just be physically literate but to also evolve skills like problem-solving, critical-thinking, etc. which shapes them into well-rounded, aware individuals for long-term success.

Gurukul system

At JCPRO, when we think of classes, we don't just think of rooms. When we think of learning we don't just think of blackboards.

Like the gurukuls of yore, which integrated the outdoors, open spaces, and a healthy interaction with the environment as part of their learning.

Combining outdoor and indoor environments are crucial to support a child's variety of interests and needs.

We learn wherever and whenever we can. By playing. By planting a seedling. By spotting insects and naming them. By painting.

The possibilities are endless.

How this works

- Your child learns to focus and becomes genuinely interested in learning
- It helps your child to pursue their individual interests and express themselves freely
- And because they can be what they want to be, they are free from stress

Performing arts

To round it all off, we immerse our students in the world of performing arts. Through music, dance, theatre, and other modes, we encourage students to follow their natural modes of expression to develop their artistic side and improve overall well-being.

**We do not need
magic to change
the world, we carry
all the power we
need inside
ourselves already**

- JK Rowling

Our Programmes

Our programmes don't feature the word 'extracurricular'. Because everything is part of the learning experience. Here are our programmes from Kindergarten to Grade 5. Where can we welcome your child?

Foundation (LKG & UKG)

We create a blend of Kindergarten and Montessori environments that prepares your child to excel at school and beyond.

Core skills	Athleticism (Active start stage)
Students learn logical thinking, literacy, numerical, and social skills.	<p>Here, the focus is simply on having fun!</p> <p>Active play at this stage is crucial to develop important connections in the brain and discover their environment.</p> <p>Children run, jump, throw, and catch to hone basic motor skills.</p>

Foundation (Class 1 & 2)

Core skills	Athleticism (FUNdamentals)
Children progress further on logical thinking, literacy, numerical, and social skills.	<p>At this stage, children learn active movement skills like agility, coordination, balance, and speed.</p> <p>They also participate in team sports to learn the critical skills of teamwork and decision-making.</p>

Primary school (Classes 3 to 5)

Core subjects	Athleticism (Learning to train stage)	Art, Music, Drama	Digital Literacy
<p>Students are now introduced to core subjects like Mathematics, Environmental Sciences, English, etc.</p> <p>Second Language Hindi/Kannada</p> <p>Core Skills Children continue with logical thinking, literacy, numerical, and social skills.</p>	<p>In addition to progressing on balance, agility, coordination and speed, students now begin learning ancillary capacities - warm up, cool down, eat right, and build mental strength.</p> <p>We focus on teaching important life skills on and off the field: healthy competition, sportsmanship, teamwork, resilience and courage.</p>	<p>It's time to introduce the arts to your child now! This is the age where arts help refine each child's motor and creative expression skills.</p> <p>It helps channel their creative energies and improves memory and confidence levels.</p> <p>For this reason, participation in visual, performing, and literary pursuits are wholeheartedly encouraged and are an integral part of our curriculum.</p>	<p>Let's face it. Your children are digital natives. And your concern levels are rising everyday about their exposure to technology.</p> <p>Our Digital Literacy programme will set your mind at rest.</p> <p>We introduce children to apps, tools and devices while educating them on what's right and wrong, defining ethical boundaries, and legalities among others.</p>

” **A teacher**
is one who makes
himself progressively
unnecessary ”

Thomas Carruthers

JCPRO Academy's teaching approaches

Alright, you know about our programmes and our values. How do we go about teaching them? We use 3 key approaches.

We are here to unlearn

We are letting go of rigid structures and long-held notions. Our teachers are focused on innovation, exploration, and discovery to bring back the joy of learning.

We use flip and double-flip models

Told you we are innovative! In the flip teaching approach, students participate in discussions and debates moderated by the teacher. In the double-flip approach, the ownership is more on the students who are encouraged to work, teach, and learn from each other.

We practise design thinking

This is a mindset and practice, which fosters collaboration and problem-solving by enabling children to identify challenges, sharpen critical thinking, and frame solutions. It's a unique approach designed to enrich your child's overall educational experience.

The playing field: Our infrastructure

JCPRO Academy has the best of both worlds.

Wide spaces across more than 20 acres of land, plenty of greenery with farms neighbouring the school, and a pond with colourful fish, are just a few of the highlights. Additionally, we have

Open learning
spaces

Indoor Badminton
court

Outdoor basketball
court

Multisport
arena

Yoga and
meditation centre

Design lab

BCCI approved cricket
grounds and indoor nets

Fitness
centre

”Our infrastructure
is as broad as
our minds.”

Staff and management

We have an outstanding team of educators, facilitators, and mentors who are committed to creating a student-centric learning environment. We take pride in having some of the most experienced professionals, sports coaches, and teachers on campus to prepare your child for excellence.

Our students are encouraged to think critically, act responsibly, respect diversity, and work collaboratively. And it all begins with their teachers.

Experience learning with purpose

Every single member of our team at JCPRO Academy firmly believes that learning needs to be an experience and a memorable one at that.

To that end, we strive to make your child intellectually agile, physically strong, and emotionally balanced.

Come, get to know us.
Visit our campus **today.**

“

We are where the **boundaries disappear** – between curricular and extra-curricular, between arts and science, between your child and excellence.
